Dear Mr Golde

Thank you for your letter and copy of "The Fundamentals of Putting". I hope you may be able to use the following as a Foreword.

"As one who was damned never to be a "safe" putter, I consider myself quite an expert on the ins and outs of that devilish part of the game of golf. It is true to say that putting is a game within a game and it really is ridiculous when you consider that "greens" are usually the best prepared part of the course and cause the most aggravation. When you see a good putter putting, it all looks so easy, but isn't that true of anything in life? Bad putters twitch and jump and move every particle of their body, sometimes except the putter head! We all try new putters, stances, grips, long putters, short putters, the list goes on and on. I found this book of great interest. Unfortunately there is no magic potion you can take to ease the pain of 3 and 4 putts but within these pages is an enormous amount of common sense and, who knows, there may be something that suits you, that helps you, and could transform your life."

There you are Mr Golde.

Best wishes

Sincerely

Peter Alliss
